

STEVEN LEMA VELÁSQUEZ

Full-Stack Software Engineer | React · Node.js · TypeScript · React Native | Computer Vision

Latacunga, Cotopaxi, Ecuador | +593 98 823 7106 | contactos@salema.dev
linkedin.com/in/salema97 | github.com/salema97 | salema.dev

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience and 12+ production projects delivered. Co-founder of Kaizen Software, a software development company serving clients in retail, education and commerce: e-commerce, multi-tenant SaaS platforms and mobile apps. Specialized in React/Next.js, Node.js/NestJS, TypeScript and React Native, with a differential in industrial computer vision (YOLO, OpenCV, edge AI on Raspberry Pi). Experience integrating payment gateways (Stripe, Payphone, Flow.cl) and deploying edge-to-cloud systems. 14 verifiable certifications.

PROFESSIONAL EXPERIENCE

Co-founder & Full-Stack Developer

Kaizen Software | Remote | Nov 2023 - Present

Software development company co-founded with partners. Custom development for clients in retail, education and commerce: from requirements gathering to production deployment and support.

- Delivered 12+ web and mobile projects for clients, covering the full cycle: requirements, architecture, development, production deployment and support (technical details in Featured Projects).
- Built transactional platforms with payment gateways (Payphone, PagoMedios, Flow.cl, Stripe), subscriptions, gamification and commission systems.
- Implemented real-time notifications (Socket.io, OneSignal) and automated queries to public portals with robust web scraping (Playwright) exposed as a REST API.
- Worked in a team under agile methodologies (Scrum), with continuous delivery and direct client interaction.

Full-Stack Developer - Freelance (Industrial Projects)

Independent | Remote | Oct 2024 - Present

Computer vision and industrial IoT systems for production plants, in parallel with Kaizen Software.

- Designed and deployed edge-to-cloud computer vision solutions for industrial quality control and safety (VisionPI, Steam Leak Detection - details in Featured Projects).
- Integrated software with plant hardware: RTSP/USB cameras, inference on Raspberry Pi 5, PLCs via OPC UA and SCADA systems.

Intern - Software Developer

ADS Software | Latacunga, Cotopaxi | Mar 2022 - Jun 2022

Migration of legacy systems to modern platforms.

- Developed C# DLLs for migrating Visual FoxPro systems to Firebase, reducing migration time by 60%.
- Programmed integration between old and new systems, facilitating communication across platforms.
- Automated data migration processes, improving efficiency and reducing manual errors.

Intern - Software Developer

UNHCR (ACNUR) | Sangolquí, Pichincha | Dec 2021 - Feb 2022

ACNUR-HIAS-ESPE social project for strengthening refugee entrepreneurship.

- Maintained and developed the Prowessec web platform (HTML, CSS, JS, PHP, SQL), optimizing performance and accessibility.
- Implemented information security improvements, applying data encryption and vulnerability protection.
- Optimized databases, improving query response times by 40%.

FEATURED PROJECTS

VisionPI - Industrial Textile Defect Detection

Textile quality control system using computer vision: YOLOv11 model detects 8 defect types in real time. Edge-to-cloud architecture: NCNN inference on Raspberry Pi 5, FastAPI + MySQL backend (JWT), React 18 panel with real-time monitoring.

Stack: Python, YOLOv11, OpenCV, FastAPI, React, Raspberry Pi, NCNN

Impact: Automated quality control in textile production plant

Steam Leak Detection - Industrial Vision OPC UA

Industrial PoC: real-time steam leak detection with CPU-optimized pipeline (MOG2 + HSV over RTSP), ultra-low-latency MJPEG stream, PLC integration via OPC UA (heartbeat watchdog for SCADA) and Next.js dashboard with hot calibration.

Stack: Python, OpenCV, OPC UA, Next.js, Flask, SQL Server, Docker

Impact: Integration with SCADA and industrial alarm systems

CopyXpress - Multi-Branch Printing Orders App

App for a copy shop chain: Flutter consumer app, Express/Sequelize API on MySQL and React/Vite panel per branch. Catalog with configurable jobs, cart, payments by bank transfer/Payphone/PagoMedios, OneSignal notifications and per-branch versioning without redeploy.

Stack: Flutter, Dart, Express, Node.js, MySQL, React, OneSignal

Impact: Multi-branch app in operation with real-time order management

Lexcard - Multi-Tenant Educational SaaS

Multi-tenant educational platform for law and medicine: tests, flashcards with progress, ebooks and clinical cases. Next.js 16 + Prisma + MySQL + NextAuth v5, React/Vite admin panel. Monetization with Flow.cl subscriptions and gamification (rankings, badges, referrals).

Stack: Next.js, Prisma, MySQL, NextAuth, React, Flow.cl

Impact: SaaS monetized by subscriptions with multi-tenant architecture

Bingo593 - Live Bingo Platform

Live bingo with Next.js App Router + PostgreSQL + Prisma: games with states, digital card sales, hierarchical agent tree with referral codes and commissions, withdrawal requests, bank transfer payment review, files on AWS S3 and player/agent/admin roles.

Stack: Next.js, PostgreSQL, Prisma, AWS S3, TypeScript

Impact: Live gaming platform with agent network and commission system

Corazón de Diamante - MLM E-commerce

Network marketing e-commerce ecosystem: React + Vite panel with dashboard (ApexCharts), visual network with ReactFlow and Leaflet maps. Compensation engine with 3x3 matrix, network, repurchase and infinity bonuses, digital wallet and Socket.io notifications. Node.js API documented with Swagger. Public repos on GitHub.

Stack: React, Vite, TypeScript, Node.js, Socket.io, ReactFlow

Impact: Complete MLM compensation engine with complex business logic

TECHNICAL SKILLS

Frontend:	React, Next.js, TypeScript, JavaScript, React Native, Flutter, Angular, Vite, Tailwind CSS
Backend:	Node.js, NestJS, Express, Python (FastAPI, Flask), C#, REST APIs
Databases:	PostgreSQL, MySQL, SQL Server, Firebase Firestore, SQLite, Prisma, TypeORM
DevOps & Tools:	Docker, CI/CD, Git, AWS S3, Redis/BullMQ, Raspberry Pi, Agile/Scrum
AI & Vision:	YOLOv8/v11, OpenCV, ONNX, NCNN, CUDA, edge AI
Integrations:	Stripe, Payphone, Flow.cl, Socket.io, OneSignal, Playwright, OPC UA

EDUCATION

Software Engineering

Universidad de las Fuerzas Armadas - ESPE | Oct 2018 - Sep 2023

Graduation thesis published in the ESPE institutional repository (person re-identification).

CERTIFICATIONS (14)

- Registered Software Engineer - SENESCYT (Nov 2023) | Credential: 1079-2023-2776775
- HackerRank (11 certifications, 2024-2025): Frontend React, Advanced SQL, Intermediate Angular, Intermediate JavaScript, Intermediate REST API, Intermediate Problem Solving, Node, Python, C# and CSS - all with verifiable credential IDs
- English B1 - ESPE (Mar 2023) | Credential: PZSH0014
- Scientific Article Writing (80h) - ESPE (Apr 2023) | Credential: CEC-2023-206

LANGUAGES

Spanish - Native | English - B1 (Intermediate)
